BNX NETWORKS

**Step-1** Double-click on the "Connect Now" shortcut to launch the application.
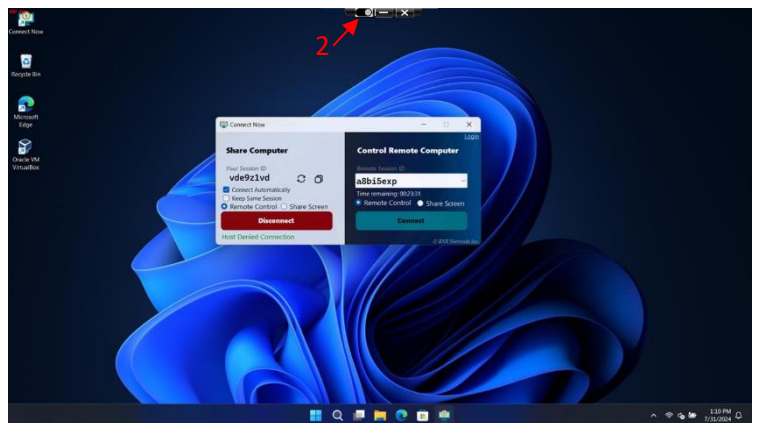

**Step-2** 1. In the target PC, select "Remote Control" or "Screen Share", and click on "Allow Access". After allowing access there will be a session Id generated.
2. By clicking on the refresh icon session ID can be changed.
3. One session ID can always be saved by checking the "Keep Session Saved" checkbox.
4. ConnectNow can always be connected with the server by checking the "Connect Automatically" checkbox.

**Step-3** 1. In the source PC, enter the generated session ID in the Remote Session ID field, select "Remote Control" or "Screen Share", and click on "Connect". It will directly show the Target PC's Screen.

2. There is a toggle button for "Turn on Control" and "Turn off Control". To get the target PC's control change the toggle to "Turn on Control".

**Step-4** Register & Login: Without login, the user can use ConnectNow for 30 minutes every day. After 30 minutes they can extend 5 minutes every time.
1. For login click on the "Login" link from the top right corner, it will open the login form. Enter the credential, log in, and use ConnectNow without any disruption.

2. To register an account click on "Signup Now" link from the login form, it will redirect you to the ConnectNow website where you can simply create an account.
